## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-10 and 15-17, drawn to Hierarchical Control, classified in class 715, subclass 514.
  - II. Claim 11, drawn to Manipulating of a data structure, classified in class 701, subclass 101.
  - III. Claims 12-14, drawn to edit, composition and storage control, classified in class 715, subclass 530.
  - IV. Claims 18-22, drawn to structure document, classified in class 715, subclass 513.

The inventions are distinct, each from the other because of the following reasons:

2. The inventions I, II, III and IV are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are defined as

Groups I – deal substantially with Hierarchical Control

Group II – deal substantially with Document Processing of Layout

Group III - deal substantially with Edit, Composition and Storage Control

Group IV - deal substantially with Structure Document

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
